

EUROPEAN TOURIST TRAIN "HYBRID" IS NOW IN THE WORLD MARKET!

"EUROGAMES" Ltd. presents to your attention another realized project!

In connection with our green ideas for transportation and tourist entertainment we wanted to create ecological electric train. Many people welcomed our idea for electric, completely silent, slow-moving and safe train, entertainment for children and adults.

Meet the world's first two custom made tourist attraction trains manufactured from "EUROGAMES" Ltd., with hybrid powered engines! Meet the first two produced in the world of "EUROGAMES" Ltd. city. Varna custom luxury hybrid tourist attraction coasters!

Locomotives are with hybrid powered engines (hybrid drive system) with a combination of powerful electric motor and gasoline engine our hybrid locomotives can overcome slopes higher than 15% with minimal exhaust emissions, in accordance with European directives for ecology. Locomotives are equipped with LED lighting, air brakes, leather interior, air conditioning system, full electric package, automatic tiptronic transmission, board computer, stereo system with a large color display, and possibility of pulling up to four wagons.

Environmentally clean, hybrid tourist trains does not need an electric charging stations, for charging their batteries. Batteries are charged with help from the gasoline engine.

Wagons and locomotives are from closed type for all season operation. Wagons are with capacity of 20 seats and opanable glass windows. Wagons are equipped with air brakes, heating system, sound system, with the possibility of mounting bike stands and platform for people with disabilities.

The project is realized with hard work, but the long-awaited result is extremely satisfactional. European tourist train "Hybrid" is now in the world market!
